MAY IS CELIAC AWARENESS MONTH

83% of the people with celiac disease are undiagnosed.

Celiac disease is the only autoimmune disease with a known trigger—**GLUTEN**. Gluten is the protein found in wheat, rye and barley and foods and drinks that contain these grains.

CURRENTLY, THE ONLY TREATMENT FOR CELIAC DISEASE IS A STRICT GLUTEN-FREE DIET.

Learn more about celiac disease and GREAT Kitchens foodservice training at www.BeyondCeliac.org/great

CELIAC DISEASE IS A SERIOUS GENETIC AUTOIMMUNE DISEASE.

1 in 133 people in the United States have celiac disease. That's approximately **3 million people**

LEFT UNDIAGNOSED AND UNTREATED,

people with celiac disease are at-risk for other serious health consequences, such as osteoporosis, anemia, thyroid disease, and even certain cancers.
